

Week 3- Day2 Assignment

Integrate the Jira with this existing codebase

Activity: Integrate the AI Agent with Jira by adding a "Connect Jira" feature that allows users to establish a connection using their Jira Base URL, Email ID, and Jira API Token. Once the connection is successfully established, retrieve and populate the available Jira user stories within the application. Ensure the implementation follows the existing project architecture, UI design, and coding standards while maintaining compatibility with the current functionality.

Sample prompt for Jira integration:

Front end:

Need to add "Connect Jira" button to establish the connection

Base url

Email id:

Jira API key

Sample prompt for UI:

Read my entire workspace and understand how UI implemented in the frontend folder

I want to add "Connect Jira" button to establish the connection(Base url

Email id,Jira API key_)

once the jira is connected userstories should be populated in the UI screen.

[STRICTLY] DO THE IMPLEMENTATION ONLY ON UI

After Implementing the UI changes, ensure that the "Connect Jira" button is functional and triggers the connection process. Upon successful connection, fetch the user stories from Jira and display them in a structured format within the UI.

To Do

As a user, I want to secretary dashboard doctor calendar so that the related

Story Title *

Employee Profile Employee Self

Description

As a user, I want to employee profile employee self so that the related functionality works as expected.

Acceptance Criteria *

Given the system is operational, when the user performs the intended action, then the system should respond accurately and meet functional expectations.

Additional Info

Jira issue: KAN-30
Status: To Do
Type: Story

Generate Test Cases

TC-002

Edit employee profile with valid data and save

Positive

A success message is shown and the updated information is persisted and displayed on the profile page

TC-003

Upload a profile picture within allowed size limit

Positive

The new profile picture is displayed on the profile page and stored without errors

TC-004

Attempt to save profile with invalid email format

Negative

An inline validation error is shown for the email field and the profile is not saved

TC-005

Attempt to save profile with a required field left empty

Negative

A validation error indicates that 'First Name' is required and the changes are not persisted

TC-006

Edit profile using maximum allowed character lengths

Edge

Profile is saved successfully and the full strings are displayed without truncation

TC-007

Upload a profile picture exceeding size limit

Edge

An error message is displayed indicating the file exceeds the maximum size and the upload is rejected

TC-008

Prevent access to another employee's profile

Authorization

The system returns an authorization error (403 Forbidden) and does not display Employee B's data

TC-009

Unauthenticated user attempts to view employee profile

Authorization

The user is redirected to the login page or receives a 401 Unauthorized response

TC-010

Profile page loads within acceptable performance threshold

Non-Functional

Profile page loads completely within 2 seconds

TC-011

Handle concurrent edits from two sessions

Non-Functional

The system detects a concurrency conflict and prompts the user in Browser B to reload or merge changes

TC-012

Graceful error handling when profile service is unavailable

Negative

A user-friendly error message is displayed (e.g., 'Unable to load profile at this time') and the application remains stable
